

Solar Project Information Sheet

Project Information

Name of Project: _____ Date ____ / ____ / ____

Address: _____ City _____

State _____ Zip _____ Phone (____) _____ - Fax (____) _____ -

Owner of Project: _____

Address: _____ City _____

State _____ Zip _____ Phone (____) _____ - Fax (____) _____ -

General Contractor: _____

Address: _____ City _____

State _____ Zip _____ Phone (____) _____ - Fax (____) _____ -

Installation Contractor: _____

Address: _____ City _____

State _____ Zip _____ Phone (____) _____ - Fax (____) _____ -

Anticipated Date of Installation: ____ / ____ / ____

What is to be powered by solar power supply? _____

Irrigation

What controller is being used? _____

If control system is two wire, how many decoders are being used? _____

In the worst case scenario, how many valves will be running at the same time either by multiple valves per zone or multiple programs running at the same time? _____

What is the maximum daily run time hours in July? _____

How many run days per week? _____

(In PDF form click on the Y or N to select with a circle, to fax form circle Y or N to select)

Is there a master valve? Y N Normally Open ____ Normally Closed ____

Is there a pump start relay? Y N

Is there a flow meter? Y N State size and brand _____

Is there a flow monitor? Y N State size and brand _____

Is there a radio or cellular phone being used? Y N

State model and brand _____

Are there any other accessories to be powered up? Y N Please state make and model

~~Control Tech USA, Inc. has the ability to custom build a control assembly with irrigation controller; do you want us to provide a quote with a stainless steel pedestal that will house both the irrigation controller and solar electronics assembled as one complete turn key unit? Y N~~

Irrigation Scheduling

Please fill in each block according to the maximum run per cycle and how many cycles will run each week. If you plan to run multiple programs, please add up total run time for each day, write that in the Run time per cycle box under the corresponding month; then how many times per week the controller will run that cycle, and write that in the Cycles per week box under the corresponding month. If the controller will not be running in a particular month, enter 0. The goal is to determine the amount of run time per week for any given month.

Month	January	February	March	April	May	June
Run time per cycle						
Cycles per week						
Month	July	August	September	October	November	December
Run time per cycle						
Cycles per week						

Lighting

What type of lights being used? _____

What type of lamp is being used? _____

How many lights are being used? _____

What is the total watts used? _____

What is light run time: Dusk to Dawn ____ Other _____

Are there any other accessories to be powered up? Y N Please state make and model

Other Equipment to power:

Please contact us and we will help you determine the right solar power supply for you.
